

PORTAFAB
Modular Building Systems

**Create. Control.
Partition. Protect.**

IDEA BOOK

Create

Whether you need to convert an open area to enclosed offices or create space out of thin air, PortaFab can help. Our modular building systems are ideal for creating everything from inplant offices and meeting rooms to 2-story inplant buildings and mezzanine-mounted structures that help you maximize your space.

Partition

PortaFab's extensive line of modular wall systems provides unmatched value and versatility across a wide variety of applications. Our customers partition office space, isolate infectious diseases, segregate production facilities, subdivide data centers and more.

Control

From achieving basic control over humidity, dust and temperature to creating entire building envelopes for the most critical cleanroom environments, PortaFab's line of modular cleanroom systems and accessories can be used to provide effective control in virtually any environment.

Protect

PortaFab's modular building systems are ideal for applications that range from enclosures that protect sensitive equipment to climate-controlled booths that help keep workers safe and comfortable while on the job.

Simplify the Construction Process

Need to Create, Control, Partition or Protect space within your facility?

PortaFab provides innovative modular building products, proven engineering expertise and local installation teams to help you fulfill these needs quickly and cost-effectively. Our industry-leading line of modular building solutions provides unparalleled flexibility for adapting to your business's ever-growing needs.

TABLE OF CONTENTS

- 6 Inplant and "Quick-Ship" Offices
- 8 Inplant Buildings
- 10 Mezzanines Office and Buildings
- 12 Interior Offices and Wall Partitions
- 14 Demising Walls
- 15 Portable/Forkliftable Booths
- 16 Cleanrooms and Environmental Enclosures
- 18 Machine and Equipment Enclosures
- 20 Parts Storage and Control
- 22 Packaging Rooms
- 23 Printing Equipment Enclosures
- 24 Powder Coating Enclosures
- 25 Paint Finishing Enclosures
- 26 Laboratories
- 28 Inspection Rooms and QC Centers
- 30 Break Rooms and Lunchrooms
- 32 Locker Rooms, Gown Rooms, and Bathrooms
- 34 Training and Conference Rooms
- 36 Control Rooms
- 38 Warehouse Area Solutions
- 40 Shipping Area Solutions
- 41 Manufacturing Area Solutions
- 42 Data Center and Server Rooms
- 43 Vertical Farming Cultivation/Grow Rooms
- 44 Booths and Shelters

Offices with Enclosed Second Floor

CREATE MORE SPACE

Inplant and “Quick-Ship” Offices

As an industry leader in providing modular building solutions, PortaFab makes construction easy for virtually any type of inplant office application.

Our innovative “Quick-Ship” program allows us to ship most standard offices within 5 days of order.

Engineering Offices

Standard “Quick-Ship” Office

Supervisor's Office

Inplant Office

First Floor Military Warehouse with Second Floor Offices

CREATE MORE SPACE

Inplant Buildings

PortaFab's large variety of interchangeable, load-bearing wall systems are ideal for creating all types of buildings within buildings.

Create entire structures or add demising walls that separate areas in large manufacturing operations.

XTRA TALL Medical Processing Building

Integrated Stair and Landing

Integrated Material Lift

Two-Story Rehab Building at a Hospital

Integrated Impact Doors

Office Over Printing Area

CREATE MORE SPACE
Mezzanines Offices and Buildings
Enhance operational efficiency at your facility by expanding vertically and turning unused space into a work platform, office or storage area. PortaFab's engineering team can help integrate structural mezzanines with its modular building systems for even greater functionality.

Equipment Enclosure with Storage Mezzanine

Car Dealership

Office on Mezzanine

Enclosed Maintenance Space

Front Office Glass Partitions

Interior Offices and Wall Partitions

PortaFab's extensive line of modular wall systems is ideal for creating interior offices and partitioning work spaces.

Framing systems can be painted in many colors (including custom colors) and can be customized with a variety of panel options.

Easy-to-Clean Walls

Fitness Center Rooms

Private Office Space

Freestanding Wall Partitions

Office Separators

CREATE MORE SPACE

Demising Walls

Create demising walls quickly and cost effectively with minimal waste and shorter installation time than traditional construction.

The modular design also allows these wall systems to be moved or relocated quickly, easily and inexpensively.

Steel Span All-in-One Wall System

Preassembled Office with Forklift Pockets

Cool Down Room

Conditioned Production Area

Integrated High-Speed Doors

CREATE MORE SPACE

Portable/ Forkliftable Booths

Take portability to a new level. While our modular building systems are easy to “disassemble and relocate,” these preassembled buildings feature an all-welded aluminum construction and rugged frame that allows these buildings to be moved throughout your facility - indoors or outdoors - with a forklift.

Easily Relocatable Office

Integrated Conveyor Openings

CREATE MORE SPACE
Paint Finishing Enclosures

PortaFab's modular building systems are ideal for enclosures that need to contain fumes, filter VOCs and maintain indoor air quality. Plus, our systems offer flexibility in design and can be easily expanded or relocated as needs change.

CREATE MORE SPACE
Powder Coating Enclosures

PortaFab modular wall systems are perfect for enclosing all types of powder coating operations.

The smooth interior wall surfaces are available with anti-static panels that minimize the attraction of powder coatings for efficient and easy cleaning.

The Top 10 Advantages OF PORTAFAB MODULAR CONSTRUCTION

1. ADAPTABILITY

Our modular components can be easily expanded, relocated or reused to keep up with your expanding business needs.

2. QUICK INSTALLATION

Pre-engineered modular systems utilize standard components and designs that minimize the time required for installation.

3. REDUCED CONSTRUCTION LABOR COSTS

Our prefabricated components install quickly and easily, resulting in a lower cost of labor when compared to conventional construction.

4. REDUCED DESIGN TIME

Pre-engineered systems reduce the amount of engineering time required to design your building. This results in reduced engineering costs, reduced architectural costs and less total time on your project.

5. CLEAN INSTALLATION

Minimal on-site construction and fabrication reduces dust and other contaminants during the installation process. This results in less disruption to the surrounding facility and a reduction in labor costs.

6. EASE OF COORDINATION

PortaFab supplies single source installation through a factory-trained distributor network - providing you with a complete turnkey approach with local support and assistance.

7. CONSISTENT QUALITY & APPEARANCE

Our attractive integrated systems are manufactured to your exact specifications, providing you with complete design consistency throughout any future additions, expansion or relocation.

8. LOW MAINTENANCE

Our durable, prefabricated wall panels require little maintenance beyond occasional surface cleaning. This eliminates costs for repainting, surface repairs or other maintenance associated with conventional construction.

9. TAX ADVANTAGES

Depreciation of modular components is usually over seven and a half years versus thirty-nine years for conventional construction, resulting in a quicker return on investment.

10. ENVIRONMENTALLY FRIENDLY

Less construction material is wasted when building with modular components. Companies can also earn LEED points to improve their Green Building Rating by building with modular.
