Free Standing Wall Partitions
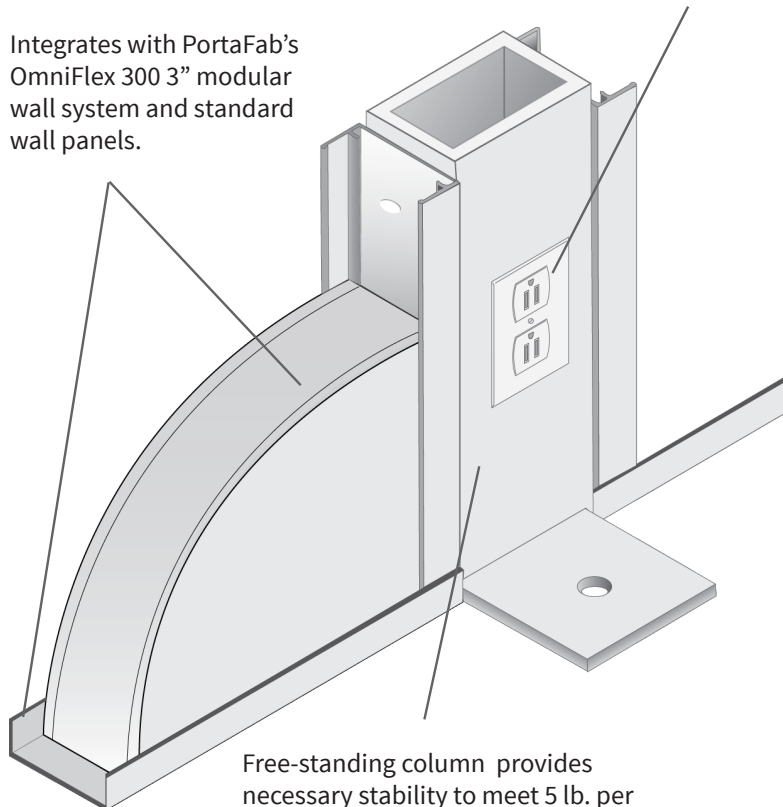

PORTAFAB
Modular Building Systems

With the free standing wall support component, PortaFab's OmniFlex 300 modular office systems can be used to create all types of self supporting walls.

- Separate plant space
- Create manufacturing cells
- Reduce material costs –no roof, ceiling, lighting, fire suppression, or HVAC
- Reduced installation time and costs
- Meets 5 lb. per square foot lateral load requirement for interior walls over 60" tall
- More durable than traditional office partitions

Why Modular?

Integrates with PortaFab's OmniFlex 300 3" modular wall system and standard wall panels.

Optional knock out for wiring.

Free-standing column provides necessary stability to meet 5 lb. per square foot load requirement.

Custom colors and window panels enhance the look for office applications.

Create defined work areas without extensive space renovations.
